

# HCS STEAM MAKER FAIRE!

## **BIOGRAPHY POSTER!**

EDUCATE YOUR AUDIENCE THROUGH A COMBINATION OF TEXT AND GRAPHICS!

Do some research on a famous (or not-so-famous) scientist. By getting to know about their life and accomplishments, you can use the powerful poster format to communicate that information to visitors to our STEAM Maker Faire.

An impressive 17" X 22" poster template, available through the annex, will help you collect all the information you need for a successful display.

### **SOME ITEMS INCLUDE:**

- A student-created portrait of the scientist.
- A Mini-movie (story frames) about their life.
- Quotable Quote - something important that they said.
- Life Lesson - something to be learned from them.
- Five words to describe the scientist.
- Super Resources - where to find more information.

There are many scientists to be found in the library or on the internet. Living scientists, or scientists long gone, it's up to you. Don't forget the "Great Minds of Science" resource that is available through the Annex. This is a great place to meet a famous scientist up-close and personal.
